

DESCRIPTION

A very practical convenient block for use by linemen when hoisting transformers, strings of insulators, and general work.

Opens easily for threading and is positively locked when closed. This unit is very short and compact.

High quality throughout. The hooks and eyes are forged steel. The housings are aluminum alloy with smoothly rounded edges that protect the rope. The sheaves are made from aluminum alloy, and have deep grooves that support the rope. Built with large axles and high-grade bearings for long life.

Choice of self-lubricating bronze, or ball bearings.

No. 2 Loose Swivel
Safety Hook

Swivel Eye

No. 6 Stiff Swivel Safety Hook

Series A153 and Series 155
